Hydrometallurgy 35 (1994) 397–399

hydrometallurgy

Contents Vol. 35

Vol. 35 No. 1

Experimental study of As(III) oxidation by hydrogen peroxide
L. Molnár, E. Virčíkova and P. Lech 1
The effects of foaming agents, and their interaction with antimony, manganese and magnesium, on zinc electrowinning from synthetic acid sulphate electrolyte
D.J. MacKinnon 11
Gold(I) extraction equilibrium in cyanide media by the synergic mixture Primene 81R–Cyanex 923
C. Caravaca 27
The extraction of gold(I) from cyanide solutions by the phosphine oxide Cyanex 921
F.J. Alguacil, C. Caravaca, A. Cobo and S. Martinez 41
Gold(I) extraction from cyanide media by the primary amine Primene 81R/iso-decanol system
C. Caravaca 53
Extractions of gold(I) from cyanide aqueous media by Primene JMT
C. Caravaca and F.J. Alguacil 67
Photostability of hydroxyoxime extractants of metals 1. Photo-isomerization and photo-degradation of 2-hydroxy-5-methylbenzophenone (*E*)-oxime
A. Olszanowski and E. Krzyzanowska 79
Electrochemical aspects of pressure reduction of aqueous Cobalt(II) by hydrogen
R.A. Wajszczuk and W.A. Charewicz 91
Reduction of aqueous cobalt(II) from acetate buffered solution by hydrogen under pressure
R.A. Wajszczuk and W.A. Charewicz 99
Recovery of copper from ammoniacal solutions by rotating film pertraction
L. Boyadzhiev and S. Alexandrova 109

Technical Notes
Leaching behaviour of iron–nickel alloys in ammoniacal solution
J. Jandová and M. Pedlík 123
Kinetics of copper precipitation by H_2S from sulfate solutions
C. Oktaybaş, E. Açma, C. Arslan and O. Addemir 129

Meeting Announcements 139

SSDI 0304-386X

Vol. 35 No. 2

Editorial
M.J. Slater i
Extraction of platinum, palladium and gold by cyanidation of Coronation Hill ore
C.M. McInnes, G.J. Sparrow and J.T. Woodcock 141
Properties of the system H_2O–NaOH–ZnO part I: Density, viscosity and boiling point
J. St-Pierre and A.A. Wragg 161
The separation factors of the lanthanides in the $Ln(NO_3)_3$–NH_4NO_3–TBP system. Effects of change in activity coefficients
M. Majdan 179
Investigation of the kinetics of chalcopyrite oxidation by potassium dichromate
M.M. Antonijević, Z. Janković and M. Dimitrijević 187
Kinetics of hydrolysis and precipitation in aqueous–organic systems. I. Analysis of homogeneous nucleation and agglomeration
Y. Konishi and F.M. Doyle 203
Kinetics of hydrolysis and precipitation in aqueous–organic systems. II. Analysis of heterogeneous growth
Y. Konishi and F.M. Doyle 223
Kinetics and mechanisms of precipitation of nickel ferrite by hydrolytic stripping of iron(III)–nickel carboxylate solutions
F.M. Doyle and A.J. Monhemius 251
A microscopic investigation of electrolytic copper powders deposited by reversing currents
M.G. Pavlović, K.I. Popov, G.Ž. Remović, V.P. Komnenić and Ž.V. Štrbački 267

Vol. 35 No. 3

The leaching of silver sulphide in ferric ion media
J.E. Dutrizac 275
Screening tests, in the study of iron oxide leaching by sucrose in sulphuric acid solution, using statistical methods
F. Veglio', M. Recinella, P. Massacci and L. Toro 293
Extraction of zinc(II) ions from sulphate solutions with mixtures of n-hexanoic acid and pentanol in n-decane
S. Kopacz 313
Copper transfer from hydrochloric acid into sulphuric acid solution by means of Kelex 100
G. Kyuchoukov and R. Kounev 321
New sulphur-containing reagents as carriers for the separation of palladium by solid supported liquid membranes
E. Anticó, A. Masana, M. Hidalgo, V. Salvadó and M. Valiente 343
Electrochemical study of pressure reduction of aqueous nickel(II) by hydrogen
R.A. Wajszczuk and W.A. Charewicz 353
The use of zeta potential measurements in inorganic ion exchange studies
R. Răutiu, D.A. White, S.A. Adeleye and L. Adkins 361

Simultaneous recovery and separation of uranium and rare earths from phosphoric acid in a one-cycle extraction–stripping process
F. Bunuş, I. Miu and R. Dumitrescu 375

Technical Note
The electrodeposition of metal impurities during the zinc electrowinning at high current density in the presence of some surfactants
M. Karavasteva 391
